* Working with XML is not only difficult, but it takes a lot of time and effort. No longer do you have to spend hours of searching and editing. Instead, you can simply design and add XML easily and effortlessly. Rinzo XML Editor is the fast, easy-to-use XML editor. Prevent Mining Block Download Description: Prevent Mining Block Download is a small program that helps you keep control of your computer by preventing or limiting your Internet downloads. It will tell you how much of your Internet bandwidth is being used by applications and systems. You can then choose which programs or services you use to download content and keep track of your Internet usage. You can limit your monthly bandwidth to a certain limit or even stop downloading altogether. This is a perfect program to help you keep control of your computer while surfing the internet. Long Play Description: Long Play is a simple song retrieval program. As long as you know the song title or the artist name, Long Play will help you find it. Long Play also remembers the location where you had found it previously and suggests it as a possible match next time you try to find a song. Spyware ID Alert Description: Spyware ID Alert is a freeware that will scan your computer looking for a program that may be a problem. When Spyware ID Alert finds a problem it will display a warning box and you will be able to select which program you want to allow Spyware ID Alert to remove. Spyware ID Alert does not remove the program or change anything about it, it just alerts you to the presence of a potential problem. Simple Player Description: Simple Player is a software that allows you to use your favorite media player (WINAMP, RealPlayer, Media Player Classic, etc.) to play media files in a web page, not only for browser, but also for other media players. It allows you to start media files directly from a web page. System Attack Lock Description: System Attack Lock is an application that will help you protect your computer from hackers. It helps you identify and remove hackers or spyware on your computer. System Attack Lock will automatically run at startup and check your computer for dangerous programs. You can also activate System Attack Lock manually from your program list. Today's Special Description: Today's Special is a freeware that will provide you with news, weather forecasts, stock quotes, and other helpful information while you surf the web. This little program will not only help you with your surfing, but also provide you 81e310abbf

Our collections of icons is a great asset of our developers and designers. We worked hard to bring you only the finest icons for your projects. All icons are carefully hand-picked, with love and collected over the years. Winter Icons: Snow.E Winter Icons are a set of 28 unique icons that are exactly what you need for your winter projects. See also Category:Icons Category:Software designQ: Alternate filename for apache2 rewrite Apache2 rewrite filename change based on the URI I would like to force a file name to be downloaded with.jpg for example. I found the following solution, but it does not seem to be working. RewriteEngine on RewriteCond %{HTTP:X-Requested-With}!XMLHttpRequest RewriteRule (.*)\.gif$ $1.jpg [T=image/jpeg] I've tested the script by adding an image that I know is not.gif to the image folder. The file extension has always remained.gif. The source code for the rewrite is as follows: RewriteEngine on RewriteCond %{HTTP:X-Requested-With}!XMLHttpRequest RewriteRule (.*)\.gif$ $1.jpg [T=image/jpeg] Does anyone know why the image is not named.jpg? A: The.gif regex matches any filename ending with.gif, but the condition you're using doesn't match anything ending with.gif. Instead, you need to capture and match the rest of the URI in the regex: RewriteEngine on RewriteCond %{HTTP:X-Requested-With}!XMLHttpRequest RewriteRule (.*)\.gif$ $1.jpg [T=image/jpeg] Association between polymorphisms of the CHK2 gene and predisposition to breast cancer: case-control study in Greece. It has been shown that the breast cancer-associated gene CHEK2 has a genetic basis. The present work aimed to investigate the association between the two common CHEK2 polymorphisms and susceptibility to breast cancer in Greek women. The selected polymorphisms were A4541G and 1100delC, located in the 10q22.2 region of CHEK2, respectively. The study was conducted on a total of
